

# BrainStorm

## Pricing & Licence Schedule

The complete AI solution for JD Edwards: conversation, search and orchestration calling over your own data, under each user's own identity, in your own language. BrainStorm is licensed as an annual subscription sized to your estate — named users plus production and non-production servers. The editions below are starting points; the final figure is confirmed by quotation.

**Indicative.** Figures are starting points (from) to support budgeting and are not an offer. Your quotation depends on user counts, server topology, environments and support level. All orders are processed by our reseller Paddle.com, the Merchant of Record.

## Editions

Edition	Price (from)	Includes	Best fit
<b>Pilot / Proof of Value</b>	\$10k fixed (30–60 days)	Limited users, one environment, assisted setup	Removes buyer risk before committing
<b>Team</b>	\$24k / yr	Up to 25 named users, 1 production server	A first department
<b>Business</b>	\$48k / yr	Up to 100 named users, 2 production servers	Serious operational use
<b>Enterprise</b>	\$95k / yr	Up to 250–500 named users, 3–5 servers	Broad rollout
<b>Enterprise Unlimited / Site</b>	\$180k / yr	Broad / site use, negotiated servers & environments	A large JDE estate

## What counts toward a licence

- **Named users** — individuals enabled to use BrainStorm. Editions are bounded by a named-user ceiling, not concurrent sessions.
- **Production servers** — each production runtime hosting BrainStorm against a live JDE environment counts toward the server allowance.
- **Non-production servers** — development, test and training instances. Most editions include a non-production allowance; additional instances can be negotiated.
- **Corpora & environments** — larger editions support multiple document corpora and JDE environments; specifics are set in your quotation.

## Subscription, support & renewal

BrainStorm editions are annual subscriptions. They include product updates and direct support for the term, and renew yearly unless cancelled. Licence counts and expiry are managed centrally on our licensing server. A fixed-price Pilot can be credited toward a subsequent subscription by agreement.

## How to proceed

Tell us your user population, JDE environments and the outcomes you want BrainStorm to deliver; we will return a fixed quotation and, where useful, a Pilot scope. Self-serve checkout via Paddle is available for our smaller tools; BrainStorm is quote-led.
